

## WHAT YOU WILL NEED:

- One old T-shirt (cotton blends work best)
- A pair of sharp scissors
- Pins

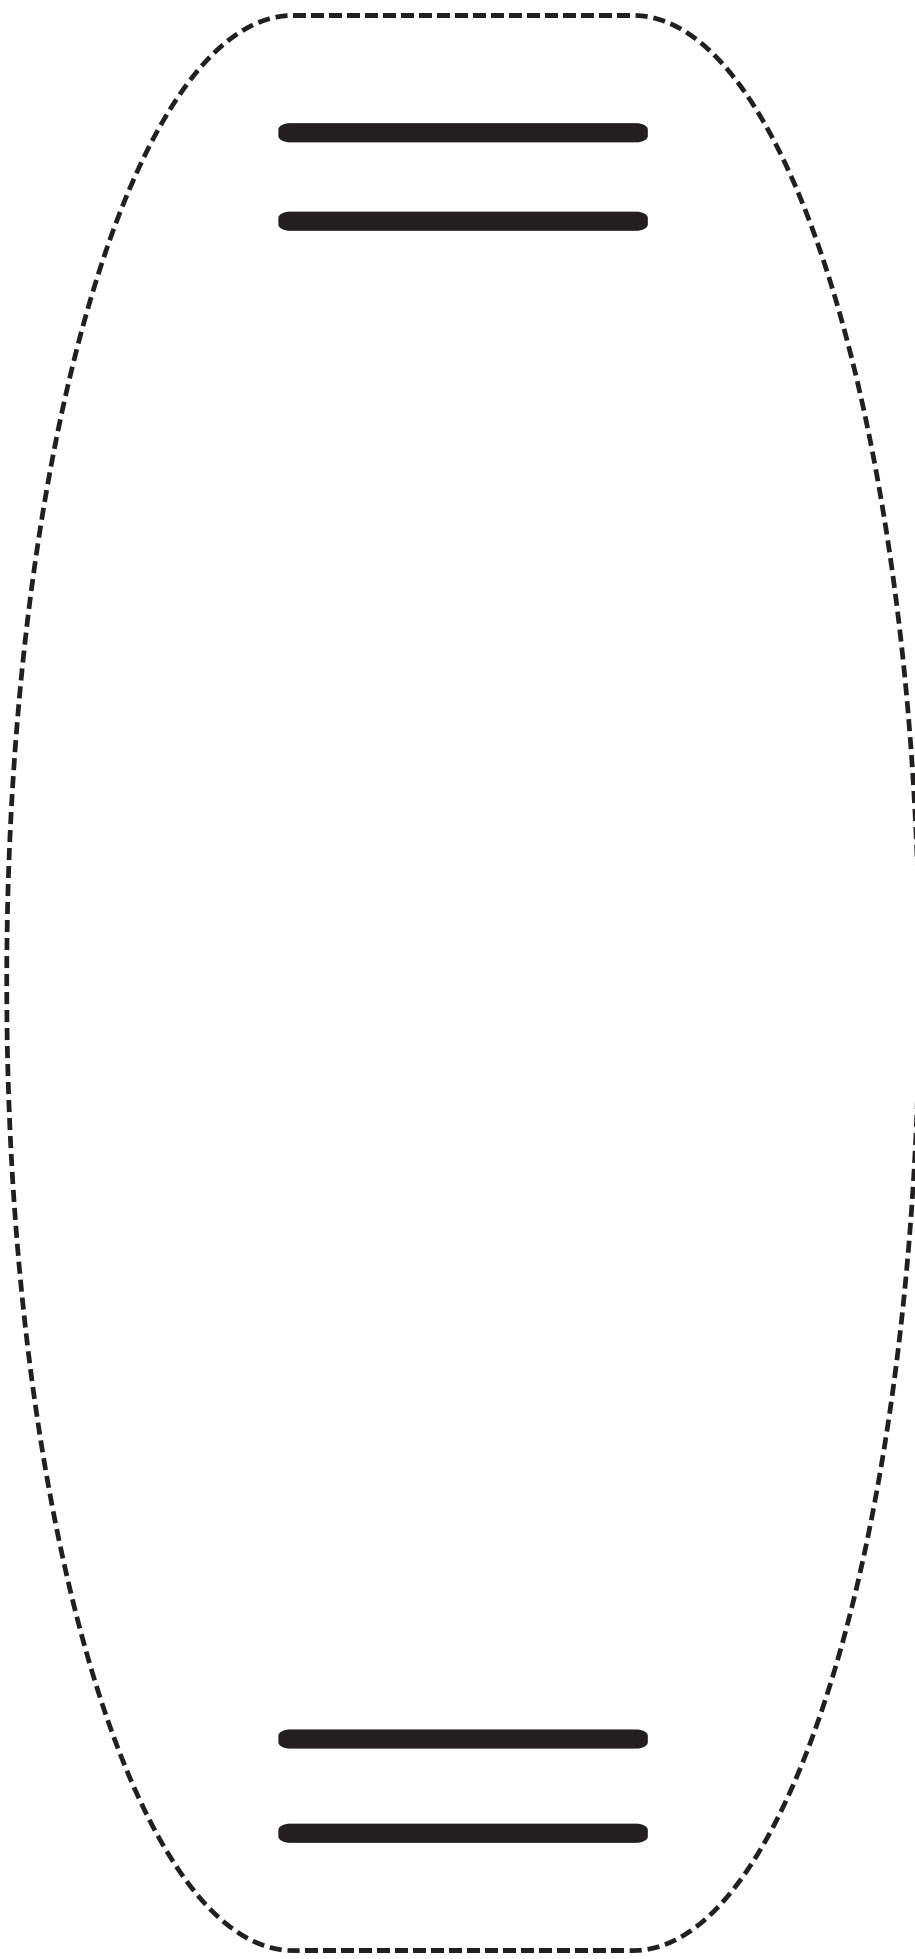

\*Print out the second page of this PDF on a standard 8.5 x 11" paper.  
You will use this as your mask pattern.

- 1 Cut out a section from your old shirt and place your pattern on top, pinning it to your old shirt to keep it in place while you cut. Be careful not to stretch the fabric.
- 2 Carefully cut the shirt along your pinned pattern.
- 3 Fold both pattern and fabric together, securing it with pins. At this time, you will cut the slit of your choice on each side. The following model contains two possible locations, which you can adjust according to your fit. Keep in mind, if the slits are not large enough, you still have a little space left at the top and bottom of the slits to enlarge if needed.
- 4 To wear, pull your finished mask in place behind your ears.
